

Distributed formation-tracking setting

Formation A

Formation B

Representative node s local processing

s expanded local view of node s

Evidence available at node s

Local measurements
measurement update at node s

Local LMB posterior
kinematic states and existence

Neighbor information
neighbor posteriors
and link outcomes

Branch-decoupled adaptive fusion

Quality cues
shared: precision, link reliability
existence cue on Bernoulli path

Shared quality score
common evidence before branch split

Spatial path
kinematic KLA fusion

Existence path
Bernoulli fusion
FID-FIA cue

Fused local posterior
extraction and forwarding
